Free C#, .Net and Sql server video tutorial for beginners and intermediate programmers.

Bootstrap paragraphs

Suggested Video Tutorials

Part 7 - Bootstrap image gallery

Part 8 - Bootstrap 3 responsive utility classes

Part 9 - Bootstrap typography

In this video we will discuss **working with paragraph elements and inline text**.

The following are the global defaults applied to the `<body>` and all paragraph `<p>` elements. In addition, paragraphs receive a bottom margin of half their computed line-height (10px by default).

Bootstrap's global defaults	
Font Size	14px
Line hieght	1.428

Bootstrap inline text elements

Purpose	Tag
Underline	<code><u></code>
Strikethrough	<code><s></code>
Highlight	<code><mark></code>
Emphasize or Italicize	<code></code>
Bold	<code></code>
Subscript	<code><sub></code>
Superscript	<code><sup></code>

Example :

```
<p>
  <u>This text will be underlined</u>
</p>
<p>
  <s>This text will be stricken through</s>
</p>
<p>
  <mark>This text will be highlighted</mark>
</p>
```

```

<p>
  <em>This text will be italicized</em>
</p>
<p>
  <strong>This text will be in boold</strong>
</p>
<p>
  This is <sub>subscript</sub> and this is <sup>superscript</sup>
</p>

```

Output :

```

This text will be underlined

This text will be stricken through

This text will be highlighted

This text will be italicized

This text will be in boold

This is subscript and this is superscript

```

Bootstrap text alignment classes

Class	Purpose
text-left	Left align
text-center	Center align
text-right	Right align
text-justify	Justify
text-nowrap	nowrap

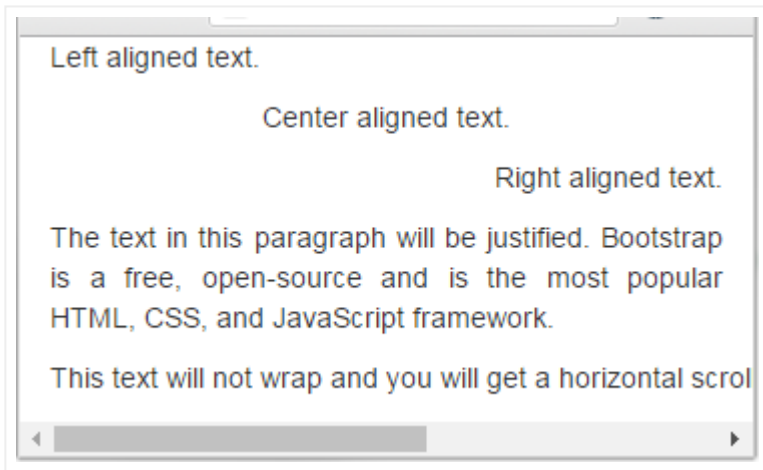

Example :

```

<p class="text-left">Left aligned text.</p>
<p class="text-center">Center aligned text.</p>
<p class="text-right">Right aligned text.</p>
<p class="text-justify">
  The text in this paragraph will be justified.
  Bootstrap is a free, open-source and is the most popular HTML,
  CSS, and JavaScript framework.
</p>
<p class="text-nowrap">
  This text will not wrap and you will get a horizontal scrollbar
  if there is no space on the screen to view.
</p>

```

Result :

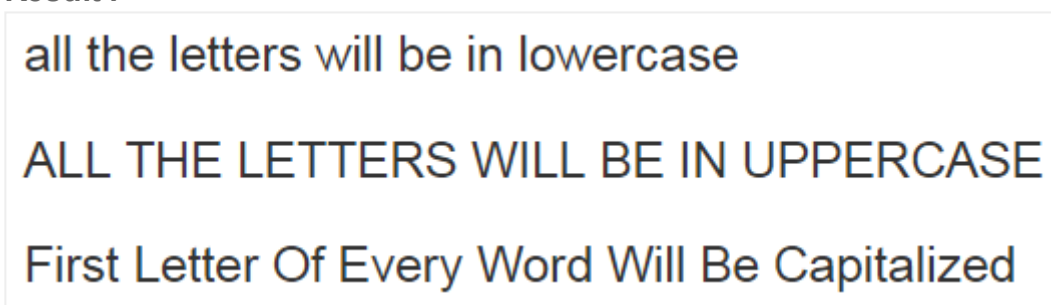

Bootstrap transformation classes

Class	Purpose
text-lowercase	Convert to lowercase
text-uppercase	Convert to uppercase
text-capitalize	Capitalize first letter of every word

Example :

```
<p class="text-lowercase">
  All The Letters Will Be in Lowercase
</p>
<p class="text-uppercase">
  All The Letters Will Be in Uppercase
</p>
<p class="text-capitalize">
  First letter of every word will be capitalized
</p>
```

Result :

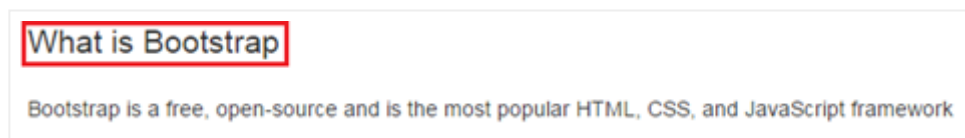

To make a paragraph stand out from the other paragraph elements, use the lead class on the paragraph element

```
<p class="lead">
  What is Bootstrap
</p>
<p>
  Bootstrap is a free, open-source and is the most popular HTML,
```

CSS, and JavaScript framework
</p>

Result :

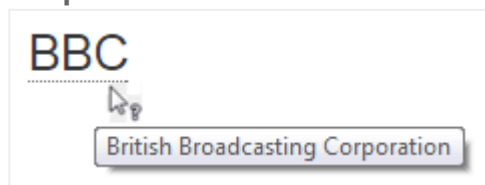

Abbreviations : Abbreviations with a title attribute displays a dotted underline. When the mouse is over the abbreviation, the pointer becomes a help cursor and the title attribute value is displayed as a tooltip.

Example :

<abbr title="British Broadcasting Corporation">BBC</abbr>

Output :

For a slightly smaller font-size apply **.initialism** class on the abbreviation.
