Part 5 - Bootstrap grid column offset

Part 6 - Bootstrap nested rows and columns

In this video we will discuss

1. Some of the bootstrap classes that we can use with images
2. Along the way, we will also build a simple bootstrap photo gallery

In Part 5 of Bootstrap tutorial for beginners, we have already discussed 4 bootstrap classes that are extremely useful to style images.

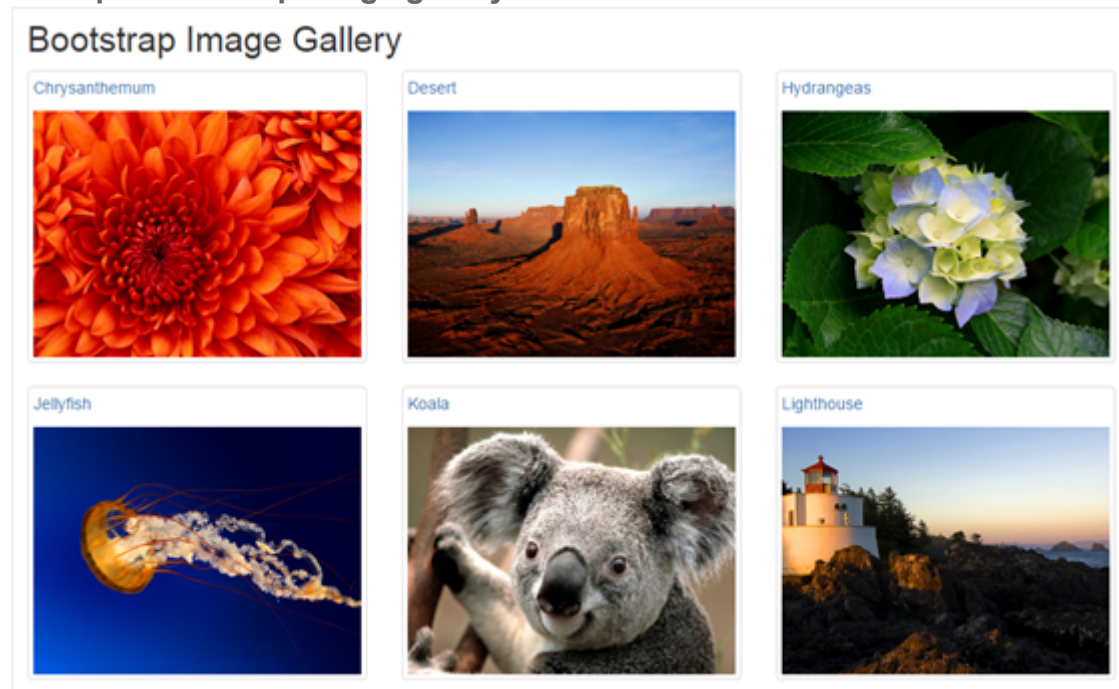

Bootstrap Image Class	Description
img-responsive	Makes an image responsive
img-circle	Styles the image as a circle
img-thumbnail	Styles the image as a thumbnail
img-rounded	Styles the image with rounded corners

Bootstrap classes to position an image

Bootstrap Image Class	Description
pull-left	Image pulled to the left and the text will then flow around the image
pull-right	Image pulled to the right and the text will then flow around the image
center-block	The image will be centered

A simple bootstrap image gallery

The image gallery should

1. Display 4 thumbnails on a large screen size
2. Display 3 thumbnails on a medium screen size
3. Display 2 thumbnails on a small screen size
4. Display 1 thumbnail on an extra small screen size
5. When you click on a thumbnail, the original image should be displayed

Here is the complete HTML of the image gallery

```
<div class="container">
  <div class="row">
    <div class="col-lg-12">
      <h2>Bootstrap Image Gallery</h2>
    </div>
    <div class="col-lg-3 col-md-4 col-sm-6">
